MODEL	SIZE	USER WEIGHT	PFD TYPE	BUOYANCY	CERTIFICATION
STERN	Adult Universal	Upto 120 Kg.	III	120N	ISO 12402-3

A personal flotation device (PFD) gives you more buoyancy to help you stay afloat in water. A PFD is an essential piece of gear for every fisherman, kayaker, canoer and stand up paddle boarder.

The most important thing is to remember to wear one when boating as unexpected immersion can lead to a serious accident that can even be life threatening. Even experienced swimmers have succumbed to the shock of immersion at times. A PFD, as the name suggests, is a floating device that is designed to keep a person's head above water in the case of a mishap.

Optional Accessories: Life Jacket Light.
